

Sample transportation made simple

Seamless transportation of closed tubes in laboratories and phlebotomy

Improve productivity

- Cut-down walking distances
- Eliminate batch process
- Reduce hands-on-time
- Optimize your processes according to the FIFO principle

Connect your processes

- Continuously transport samples to the ATRAS for registration and sorting
- Distribute registered samples to the next work area
- Create a fast and constant sample flow

Experience a new flexibility

- Customize InTrac to fit your space
- Overcome obstacles within the laboratory
- Easily break through walls
- Transport samples to other floors
