

CENTRIFUGATION MODULE

Automated centrifugation and rack building

OPTIMIZE YOUR PROCESS TIMES

Automated centrifugation of 500
samples/hr per module within
an 8-minute centrifugation

Continuous centrifugation - no
need to wait for full rack loading

Consistent sample quality
(temperature controlled at room
temperature)

RELIEVE BOTTLENECKS

Automated transfer of samples
to laboratory-specific output
racks

Reduced walking distances
through direct connection to
ATRAS

High-throughput centrifugation
to reduce TAT

CONFIGURE YOUR SOLUTION

Customizable rack plate for
input & output racks

Connection of up to 4 modules
for increased throughput or
centrifugation with different
profiles

Sorting into output racks
possible without centrifugation

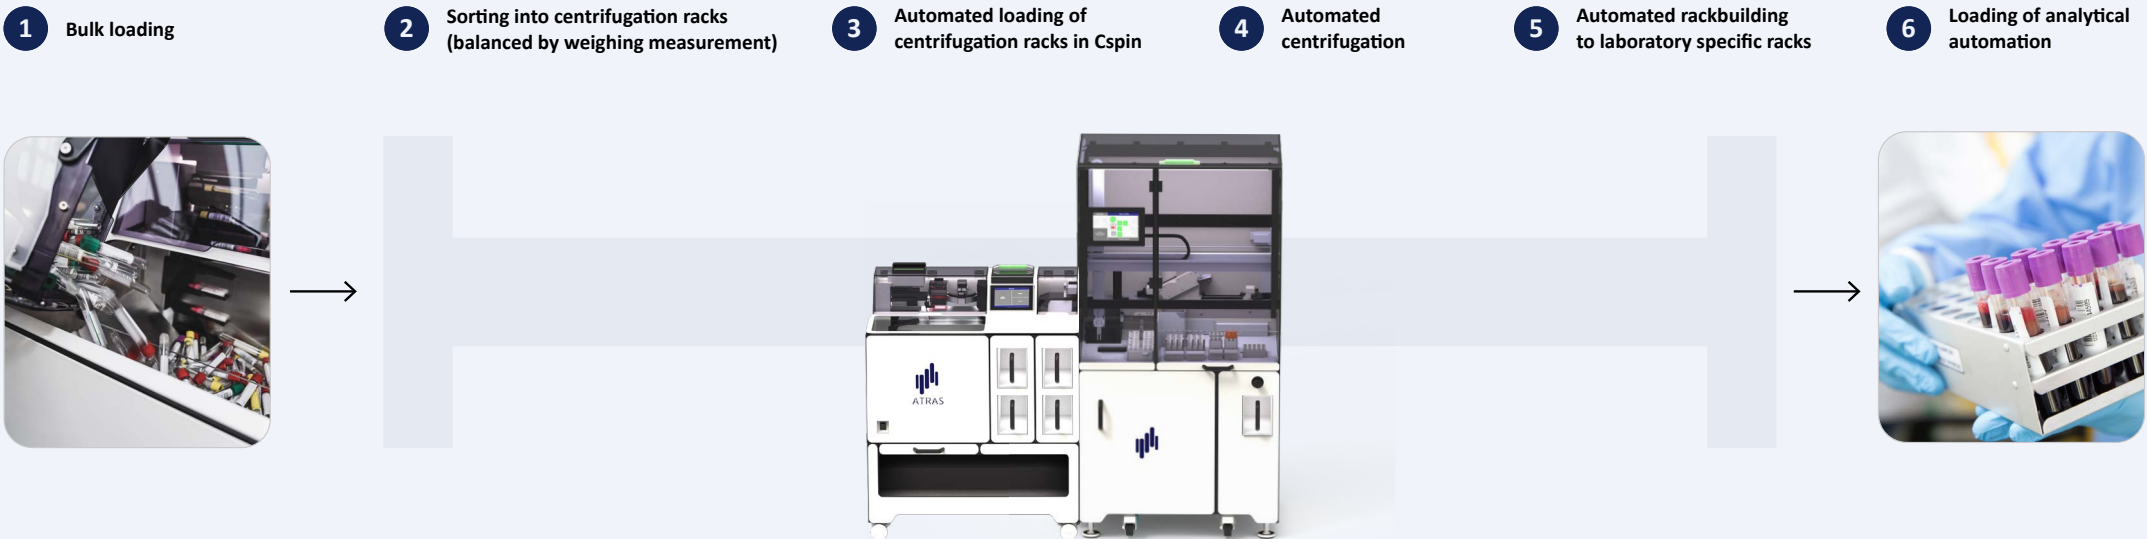

Example of centrifugation process without CSpin
